By Aatif M. Husain

Demos Medical Publishing, United States, 2015. Paperback. Book Condition: New. 2nd Revised edition. 259 x 183 mm. Language: English . Brand New Book. Praise for the First Edition: [T]he book addresses the main targets in neuromonitoring, including somatosensory evoked potentials, EEG, and other technologies that have recently become available that helped neurosurgeons perform safer operations, with a lower incidence of morbidity and mortality. Because of its direct clinical applications, this is a good purchase for any neurological and neurosurgical library. - Doody's Reviews I would certainly recommend [this book] to any technologist who monitors in the operating room. American Journal of Electroneurodiagnostic Technology This is a fundamental resource for physicians, technologists, and other health professionals who need to acquire state-of-the-art skills in neurophysiologic intraoperative monitoring (NIOM). It covers basic aspects of monitoring, describes the clinical and technical requirements for monitoring specific types of surgeries, and addresses the administrative aspects of running a NIOM service. The second edition has been updated to incorporate the vast amount of new information and techniques that have evolved since the publication of the first edition. This includes expanded coverage of each of the modalities used in monitoring (SEP, MEP, BAEP, EEG, and EMG) which are...
