

Deterraforming the Planet Earth and Its Homo Sapiens: : Alien or Mega-Donor Conspiracy?

Filesize: 8.12 MB

Reviews

This book will not be simple to get going on reading but extremely exciting to read through. Yes, it can be play, still an interesting and amazing literature. I am very easily could possibly get a delight of reading a written book.

(Rene Olson)

DETERRAFORMING THE PLANET EARTH AND ITS HOMO SAPIENS: : ALIEN OR MEGA-DONOR CONSPIRACY?

Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.The purpose of this book is to describe the causes of deterraformation and how this process precipitates the terraformation of other worlds. It discusses why billions are being invested in the latter as opposed to the former process. The terrestrial or grounded culprits identified for the drastic climate changes being experienced are greedy polluters and their surrogates who sell representative government to the highest right-wing bidder, as well as extraterrestrials vested in deterraformation of Earth to further extract its resources without interference. It presents Exo-theories that the natural and human causes of global warming are extraterrestrial by design and continuous contact. The history of such contacts is used to explain that mankind's existence is an outcome of numerous extraterrestrial agendas between competing off-world and multi-dimensional beings. This book tackles the question and seeks to extract answers to the causes for global warming from human to extraterrestrial activity. It examines the extent of climate change and its implications for the continuous habitation of mankind on this planet. The book shifts to theoretical constructs for the terraformation of other worlds. The most selected of the worlds, Mars is the subject of what steps need to be taken to make this planet the first to habitat considering its extremely cold and dry climate and thin atmosphere. This study extracts lessons from Earth's greenhouse effect. It identifies the leading emissions and the chemicals needed to warm the Martian atmosphere and theoretically cool the atmosphere of Venus. The book explains how the politics of greed lead to the deterraformation of the Earth resulting in planetary havoc. In doing so, the vivid definition of terraforming and deterraforming is given. In making other...
