

Report Volume 97-99

By United States. Dept. Agriculture

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 222 pages. Dimensions: 9.7in. x 7.4in. x 0.5in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 edition. Excerpt: . . . or soft grocery sugar. But by far the largest percentage of sugar produced is a brown sugar of 96 polarization, which is sold to the refining companies for the production of white granulated sugar. The three grades mentioned above are produced as what might be termed first sugars. There are always produced second sugars coming from the molasses from the first sugars, which are always brown in color and of somewhat lower polarization. These are often mixed with the first sugar or sold independently as molasses sugars and vary in polarization from 88 up to 93 and 94. The molasses from these sugars is stored over the summer and a third crop often obtained. These third sugars are of still lower polarization and color, ranging from 80 to 85. The small production of white granulated sugar is generally sold direct for consumption to local...

Reviews

An exceptional pdf and also the typeface applied was intriguing to read through. It is definitely simplified but excitement in the 50 % in the ebook. I discovered this ebook from my dad and i recommended this pdf to find out.

-- Jarod Ward

Complete information for publication enthusiasts. It is really basic but shocks inside the fifty percent of your book. I am just delighted to let you know that this is basically the finest book i have read through in my individual lifestyle and might be he best pdf for actually.
