The marked increase in life-expectancy in Down syndrome since the 1990s, although a very good sign in itself, raises important questions regarding the health issues, cognitive involution and social and professional inclusion of people with the condition. In this text, a large group of leading specialists have supplied a series of papers on many aspects of this issue, ranging from epidemiology, genetics, medical issues, Alzheimer s disease, cognition and language, to sexual behaviour and contraception, family issues, professional orientation and work experiences.
